

HI, I AM CAROLINA PEREIRA

Aspiring Data Analyst & Developer transitioning from Textile Engineering. Skilled in Python and Front-end technologies, transforming complex data into accessible, user-friendly digital experiences.

CONTACT ME

MY CAPABILITIES

IEFP - EFA Nível 4 | [2025] – [2026]

I now focus on integrating Python data analytics with intuitive front-end solutions to deliver actionable insights that drive process efficiency and informed decision-making.

I completed a rigorous 1,200+ hours software development program.

MY EXPERIENCE

Wall Street English B2

NEEPUM Excel Int/Adv

Harvard CS50 SQL

Harvard CS50
Introduction to Python

Industry Production
Textile Engineer

— 3 Years

Gained professional resilience in a high-pressure industrial environment. Optimised processes and led quality control initiatives, developing a logical mindset and analytical approach now applied to data architecture and software debugging.

Curricular Internship BuildCode
Full-Stack Developer Intern

Apr 2026 — Present

Applying software engineering principles to web development by designing robust solutions with ASP.NET MVC and Entity Framework Core. Implementing efficient CRUD operations and managing database integration while ensuring code scalability and following industry best practices.

MY PROJECT

Webpage focused on sustainable technology and the Zero-Waste movement. Developed Gastrologic, a full-stack platform designed to optimize food resource management and eliminate organic waste through precision nutrition and inventory intelligence.

PROJECT INFO

Year	2026
Scrum	Product Owner
Role	Front-end Developer
