

HI, I AM CAROLINA PEREIRA

Aspiring Developer transitioning from Textile Engineering. Skilled in Python and Front-end technologies, transforming complex data into accessible, user-friendly digital experiences.

CONTACT ME

MY CAPABILITIES

Minho University - Textile Engineering |
Master Degree / [2016] – [2022]

Achieved strong analytical and problem-solving skills through a technical Master's degree, with expertise in textile materials, product development, and engineering research.

IEFP - EFA Level 4 | [2025] – [2026]

Completed a rigorous 1,200+ hour software development program, earning a Level 4 qualification in Computer Programming.

MY CERTIFICATIONS

- Harvard University: CS50's Introduction to Programming with Python | 2026
- Harvard University: Introduction to Databases with SQL | 2025
- HackerRank: JavaScript Basic | 2026
- Cisco: HTML Essentials | 2026
- Cisco: Operating Systems Basics | 2025
- Citeforma: Websites with Wordpress and Elementor | 2025
- OERN: Web & Social Media Content Management | 2022

MY EXPERIENCE

*Social Media Manager Part-Time
@Farmacia Narcisa C Dias*

Dec 21 – Dec 24

Managed social media across 3 platforms (Instagram, Facebook and Linked In), growing followers from 100 to 700. Created 20 monthly content pieces and managed content calendars, maintaining 5 posts per week.

Textile Engineer @Lameirinho

Jan 22 – Sep 24

Optimized dyeing processes for 32 production batches, achieving 18% improvement in reproducibility between laboratory and production scales. Provided technical support to 5 textile startups through the 'Test Beds - Textile of the Future' initiative

Full-Stack Developer
@BuildCode

Apr 26 — May 20

Developed 1 web applications and features using ASP.NET Framework MVC and React, serving active users. Built complete authentication workflow from scratch using ASP.NET MVC framework, including login verification, user session management, and client details page.

MY PROJECTS

Gastrologic

Implemented Gastrologic, a full-stack Zero-Waste platform using React, Node.js, and Express. Integrated 2 external APIs for recipe searching and nutritional analysis, providing access to 10,000 recipe combinations, utilizing SQLite for inventory intelligence and Tailwind CSS for a responsive UI. The project applies an engineering mindset to eliminate organic waste through data-driven food management

Habits-at

Collaborated on a habit tracking PWA using Next.js and React, prioritizing a "warm" aesthetic over traditional UI frameworks with a custom CSS design system featuring dynamic theming. I helped implementing frontend logic including a browser-based notification scheduler and a local-first persistence layer via the Context API, ensuring an accessible and offline-ready user experience.
